Career Profile:

Results-driven .NET Core Developer with 4+ years of experience designing and deploying scalable enterprise applications across Healthcare and Travel & Tourism domains. Currently working with **The Riya Travel Expert (Mumbai)**, building high-performance backend systems using .NET Core, PostgreSQL, Docker, AWS, Elasticsearch, Kibana, and Redis. Strong expertise in developing secure RESTful APIs, optimizing application performance, and implementing distributed architectures. Experienced in cloud deployments, real-time integrations, and third-party API services. Open to relocation to the UAE and available to join within 30 days.

Key Skills:

Languages/Frameworks	C#, .NET Core (8/6/5), LINQ, Dapper, Entity Framework (EF)
Databases	MS SQL Server (2019/2022), PostgreSQL, Redis
Web Technologies	RESTful APIs, ASP.NET Core MVC, Web API, JavaScript, Angular(v12-v14), TypeScript
Engineering Tools	Visual Studio, SSMS, VS Code, IIS, GitLab, S3 Bucket, GitHub Copilot, Docker, Elasticsearch & Kibana
Third Party Integration	Agoda Hotel API, Expedia Hotel API Cleartrip Hotel API Stripe (Payment), Twilio (Messaging), Zoom SDK (Meeting), Google APIs, Eligibility Check (Orbit HC), Vital Reading (Mio-Connect, Dexcom), Notification (FCM), Single Sign ON (SSO)
Cloud	AWS (S3 Bucket, KMS, Lambda, AWS Secrets Manager) Azure (Blob Storage, Key Vault, Azure Functions)

Key Achievement:

- Rising Star of the Quarter (Jan 2024) Recognized as the Rising Star of the quarter at OSP Labs for outstanding performance
- AWS Certification

Education:

- Master of Computer Application: Mumbai University (2025)
- Bachelor of Computer Application (BCA) - School of Management Sciences Varanasi 2021

Working Experience:

Riya The Travel Expert | Senior Software Engineer

Mumbai, India | Jan 2026 – Present

Leading travel and tourism technology company delivering large-scale flight and hotel booking solutions.

Key Contributions:

- Designed and developed scalable Hotel Booking APIs using ASP.NET Core MVC and .NET Core.
- Integrated third-party hotel provider APIs including Expedia, Agoda, and Cleartrip.
- Built centralized hotel aggregation services to normalize and process multi-provider hotel inventory and pricing data.
- Developed high-performance backend systems using PostgreSQL with optimized query execution.
- Containerized applications using Docker to ensure consistent deployment environments.
- Implemented Elasticsearch and Kibana for advanced search functionality and log monitoring.

OSP Labs | Software Developer

Mumbai, India | Jul 2022 – Nov 2025

A software development company specializing in healthcare, enhancing operational efficiency, productivity, and customer service for industry partners.

Projects: Baby Live Advice, Health Connect, Ambient Care

Backend (.NET Core)

- Designed and developed secure RESTful APIs using ASP.NET Core for multi-tenant healthcare platforms.
- Implemented JWT-based authentication and role-based authorization ensuring HIPAA-compliant access control.
- Built high-performance data access layers using Dapper and optimized complex SQL queries.
- Integrated SignalR for real-time notifications and communication features.
- Developed scheduling and meeting management modules with concurrency handling.
- Implemented Firebase Cloud Messaging (FCM) for cross-platform push notifications.
- Collaborated in Agile sprints from requirement analysis to deployment.

Frontend (Angular 12–14)

- Integrated .NET Core APIs into Angular applications using RxJS and service architecture.
- Implemented Google SSO (OAuth 2.0) authentication.
- Built dynamic reactive forms with validation and large dataset handling (pagination, filtering, sorting).
